ORIOL 360 is the name we use for our continuous care management concept. We teach the community through programs and events about wellness. When someone needs rehab after an illness or surgery, they can stay with us. Once patients are discharged to home, our home health staff can take care of them at home with nursing, therapies and extra help. Perhaps a person may still need some type of therapy for strength, and they can return to us for outpatient therapy.

Please know that you have a choice when choosing your care providers with a hospital or doctor. You must first ask for Oriol before they will contact us for your care.
